

Science Club!

Do you love **science**?

Do you want to **share** science ideas with your **friends**?

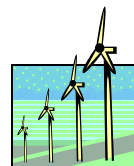

Do you like to do **hands-on experiments**?

If so, Science Club is the activity for you! Science Club will meet every Wednesday after school beginning November 6th. In Science Club, students will have the chance to participate in fun, hands-on science experiments. Each week we will focus on a new area of science, many times using event ideas from the Science Olympiad competition.

Later in the year, members of the Science Club will participate in a Milk Carton Derby! Throughout the year we will be collecting $\frac{1}{2}$ gallon cardboard cartons from milk or juice. Using these containers, students will build life-sized rafts. Upon completing the project, we will board the rafts and race them in the pool!

You can help the Science Club by sending in your cartons. Any $\frac{1}{2}$ gallon cardboard cartons will do! Please **rinse them out** before sending them in, and please **include the cap**! There is a collection box outside the main office.

Due to a limited amount of space, Science Club will be limited to the first 30 students to sign up. Permission slips will be available from Ms. Cohen in the science lab beginning Monday, October 28th. Announcements will be made at school.
